- Explosive Detection Canine Teams
- Enhanced Protection Specialists
- SmartTech® Remote X-ray Screening
- SmartChem Remote Chemical Hazard Monitoring
- Secure Training
- Maritime Security
- Risk Assessments
- Special Event Security
- X-ray Equipment Sales and Leases

MSA was one of the first four companies in the nation whose services were **certified by the Department of Homeland Security (DHS)** under the **Support Anti-Terrorism by Fostering Effective Technology (SAFETY) Act** of 2002, and **is the only one specializing in explosives detection security**. This certification ensures our customers will not have any “potential liability” for damages when explosive detection canine teams or SmartTech® are “deployed in the defense against, response to, or recovery from an act of terrorism.”

Services and Solutions:

Explosive Detection Canine Teams (handlers and canines)

MSA is the largest provider of Bomb Dog teams in the United States. We presently have over 100 Bomb Dog teams nationwide, performing vehicle screening, building perimeter security, and explosive detection sweeps. Our handlers are specialists in the field of explosive detection security with years of experience in specialized law enforcement units, (Bomb Squad/Emergency Service) and have graduated from the FBI Hazardous Devices School or have military experience.

Enhanced Protection Specialists

MSA's Enhanced Protection Specialists (EPS) are trained to envision and defend against possible terrorist attack scenarios, deny terrorists access to secured facilities, and to respond to actual terrorist attacks. With each deployment MSA utilizes the same basic security principles, but adapts them for the requirements and threats unique to each facility. MSA created the position of EPS to address security needs in an ever-changing world. Experience, training, and technology achieve specialized law enforcement caliber proficiency that is a force multiplier for companies that are serious about the security of their personnel and property.

SmartTech® Remote X-ray Screening

SmartTech® eliminates unnecessary evacuations, the disruption of service, and the loss of revenue that usually result from a suspicious package entering your facility. With SmartTech® you have instant access, via the internet, to highly trained and experienced Bomb Technicians. Your X-ray Screener and our Bomb Technician are able to view, discuss, and determine the course of action for a suspicious package, in real time, from anywhere in the world 24/7.

SmartChem Remote Chemical Hazard Monitoring

SmartTech® Chemical Incident Monitoring provides our clients with a transparent monitoring solution for an external or internal catastrophic chemical attack or release. Strategically located, state of the art chemical sensors continually monitor the building environment for the presence of an array of Chemical Warfare Agents (CWA) and Toxic Industrial Chemicals (TIC), sending the data to the MSA Command Center. Our multi-tiered approach augments the sensor technology with multiple layers of support including trained technicians, reach back capability to subject matter experts, system maintenance, response protocol development, and training.

Secure Training

Our Specialized Training Courses encompass all aspects of facility and perimeter security. MSA's expert and certified instructors use targeted modules, a hands-on approach, and realistic training aids to provide your personnel with the highest level of security training available. Initial and refresher training or certification is available on-site, in our classroom, online at MSA ELearning, and via SmartTech® terminals or video. MSA can provide training in Explosive Awareness, X-ray Image Interpretation, WMD Awareness, Emergency Evacuation Planning, Terrorism Trends and Indicators, Anti-Surveillance Efforts, and many additional security related topics.

Maritime Security

As a provider of Maritime Security and terminal service to Cruise Lines we are a leading innovator of new technologies and systems. MSA was the first security company in the United States designated and certified by the Department of Homeland Security (DHS) to provide anti-terrorism technologies. Our Bomb Dog program is the only one in the country with DHS SAFETY Act Certification. MSA's personnel, products, and services provide the maritime industry with unequalled protection against explosive and radiological devices, chemical attacks, biological attacks, and high risk intruders. All of our services can be tailored to suit your organization's specific needs and threat level.

Risk Assessments

MSA's Risk Management Team works with your Security Department, key management personnel, and staff to identify security vulnerabilities, prioritize high risk threats, and recommend procedures and countermeasures to protect critical assets. We provide in-depth solution based Qualitative and Quantitative Risk Analysis Reports which supply statistical insight to risk prediction, potential impact of threat occurrence, and the Return on Investment (ROI) of implementing our recommended safeguards.

Special Event Security

The MSA Special Event Security Team has the expertise to enable your company or organization to meet the challenges presented by high-level special events, on or off site. We perform pre-event site analysis and provide personnel, on-site security management, and the necessary equipment to protect your guests and property. The MSA Special Event Security Team is comprised of active and former military and local, state, and federal law enforcement officers. With NYPD Emergency Service, Bomb Squad, HazMat, FBI and other specialized security training, our personnel can address any security issue.

X-ray Equipment Sales and Leases

MSA has the latest in X-ray and Detection Equipment available for purchase or lease. MSA also provides consulting to source equipment and hardware that best addresses any organization's needs. We are dedicated to establishing long term relationships with our clients through a focused effort to improve their physical security.

Solutions Provided – Past:

United Nations (UN):

From 1997 through 2004 MSA provided the United Nations three (3) explosive detection canine teams for a twelve (12) hour shift five (5) days per week. In 2004 the UN Security Forces stood up a proprietary explosive detection canine program. MSA was instrumental in the training and deployment of these new teams.

Internal Revenue Service (IRS) Holtsville, NY:

From 2002 through 2006 MSA provided the Internal Revenue Service with one (1) explosive detection canine team for a thirteen (13) hour shift five (5) days per week. During tax filing season MSA provided one (1) additional team.

Solutions Provided – Present:

U.S. Marshals Service (USMS):

MSA presently provides the U.S. Marshals Service with three (3) explosive detection canine teams seven (7) days per week. One (1) team covers a twelve (12) hour shift, while the other two (2) teams each cover an eight (8) hour shift. MSA has provided this service from 1995 through the present.

Internal Revenue Service (IRS) Andover, MA:

MSA presently provides the Internal Revenue Service with two (2) explosive detection canine teams for two (2) eight (8) hour shifts five (5) days per week. During tax filing season, MSA provides one (1) additional team. MSA has provided this service from 2005 through the present.

U.S. Military Academy at West Point (USMS):

MSA presently provides the U.S. Military Academy at West Point with one (1) explosive detection canine team for a thirteen (13) hour shift five (5) days per week. For special events, (i.e. home football games, commencement) MSA provides between six (6) to eight (8) additional teams. MSA has provided this service from 2002 through the present.

U.S. Department of Homeland Security/Federal Protective Service

MSA presently provides the Department of Homeland Security/Federal Protective Service with one (1) explosive detection canine team for one (1) ten (10) hour shift five (5) days per week. For special events MSA provides additional coverage hours and/or teams as required.

New York City Department of Transportation (DOT):

MSA presently provides the New York City Department of Transportation with eight (8) explosive detection teams for eight (8) twelve (12) hour shifts seven (7) days per week.

The City of New York:

MSA presently provides the City of New York at 1 Centre Street with one (1) explosive detection canine team for one (1) seven and a half (7 ½) hour shift five (5) days per week.
